

Features & Facilities

Golf City:

Two 18 hole championship golf courses and two 9 hole golf courses - spread all over the township acting as a hallmark recreational green lung and a major attraction only of its kind golf facility in the entire country to host golf events. The Golf Community residential clusters, in the proximity, shall showcase the best living & lifestyle for the elite. Giving it company will be numerous gymnasias and clubs.

Education City:

A very special and unique educational hub in the region - a conglomeration of world class educational institutions, which would come up preferably with foreign collaboration.

Besides Nursery, Primary and Secondary education, a best-in-class Technical University and College of Engineering are also envisaged - as true "national level" institutions. Comparable with the finest, these will be designed to attract students from all over the country.

IT Parks:

24x7 work culture in Information Technology with a safe and green urban environment. Businesses that will get the high-end infrastructure they deserve.

From pollution-free environs to reliable services, sophisticated support systems to facilities for leisure. Apart from the regular offices and working spaces, the township would house shopping outlets, restaurants, cafés etc. for working people along with the spaces like amphitheatres, fields, picnic areas and recreation which would impart a unique enjoyable character to the whole working environment.

Medi-City:

The campus shall have cutting edge technology for medical research, diagnosis and treatment. This multi-disciplinary super specialty Medical Infrastructure with the added advantage of the Heliport and Golf Course will become one of the major epi-centres in the region for medical tourism.

Sports Academies:

To create an interface or a seam between the Residential and Institutional Zone. This would also be a potential infrastructure for the forthcoming Commonwealth Games and providing opportunities to the youngster of the region.

International Level Water Sports:

Also features a large man-made lake that is capable of hosting international standard water sports activities in the region. One can have a great experience boating-skiing-sailing within the township itself.

Mega Trade & Exposition Mart:

A world-standard Mega Trade Mart and Exposition Centre, which would provide the opportunity for industrial and humanitarian development.

Agrarian Park & the Institute of Organic Farming:

The agrarian park will enrich the space with their visual qualities and also create a natural setting for the new community. The resident community at the city would become a self-sufficient community by growing its own grain, vegetables and fruits in the organic and bio-dynamic farms by using latest agricultural processes and technologies.

City with Modern & Hi-tech Infrastructure Facilities
The city would provide world-class infrastructure facilities - a place to leisure, work and live.

We propose to create an eco-friendly, pollution-free and energy-efficient city that would provide hi-quality living environment with the protection and conservation of natural environment and natural features of the proposed site.

Uninterrupted Power Supply

While adequate connectivity with the regional power grid will promise a normal supply of electricity, it will also be backed up by captive generation. This will make true uninterrupted power a reality.

Clean, Continuous Water always on Tap

Water will be plentiful, safe and available round the clock. Blessed with a high and large water table, the township will harness this rich natural reservoir easily and effectively.

Use of alternative sources of energy & World Class Energy Saving Systems

Use of solar energy for lighting and other modern environment friendly technologies for sewage disposal, effluent treatment and rainwater harvesting.

Well Connected Transport Network

Transportation within and outside Hitech City has been planned for smooth and efficient operation. Special deluxe coaches will provide services to all key locations locally and in the vicinity.

All vehicular traffic within Hitech city will move in a smooth, continuous loop with an uninterrupted flow. Traffic will follow a wide 60-meter arterial road, connected by ramps leading from individual sectors.

Dedicated pathways for pedestrians will virtually eliminate the interface between those driving and those on foot. The roads themselves have been envisioned with raised carriageways to discourage access to pedestrians and simultaneously provided with exclusive underpasses to help them cross the street.

Heliport

A heliport, which would be first of its kind in the private sector is proposed with about 50 helipads and related facilities. This infrastructure would support the other infrastructure like Medicity, IT Park, Town Centre, Retail and Entertainment Centre, Mega Trade and Exposition centre, Convention facilities and other magnet activities proposed and thus would play a vital role in their long term growth and economic health.

Intelligent Garden City

The Township is proposed to be developed as an intelligent garden city, where residents enjoy the convenience of technology in the lap of nature. A habitation where one could compete with the world yet breathe fresh air in a peaceful and clean environment. The township shall apply all green practices of water and energy conservation to ensure an eco-friendly and zero-pollution environment.

Telecommunication Services

The township is supported by an advanced high capacity, fully digital telecommunication infrastructure to access the advanced information and communication services. Every part of the township is connected to a high bandwidth network that will provide 24/7 access to local and global services.

Pollution Free Environment

Driven by the objective of zero pollution, the township's gas turbines will use clean natural gas fuel. And will operate in co-generating mode for maximum system efficiency.

Underground tunnels and ducts will facilitate regular maintenance without disturbing surface landscaping and aesthetics.

Safety and security

Latest centralized security system & wi-fi system shall be provided.

Leisure & Recreation

Recreation and leisure will be a part of the privileged lifestyle once you are at Suncity NCR East.

- ▶▶ Palate stimulating restaurants that will offer cuisines from across the world.
- ▶▶ Classy shopping malls that will remind you of their global counterparts.
- ▶▶ Vibrant multiplexes that will screen blockbusters.
- ▶▶ Swinging discotheques that will help you let your hair down.
- ▶▶ And, if your mood is subdued, sprawling green parks will offer space to take that quiet walk in.
- ▶▶ Essential Services

A complete self

sufficient township where residents need not bother to handle routine chores. At Hitech City, the presence of everything nearby - from banks to ATMs on one hand and post-offices to hospitals on the other - will ensure ease for all concerned.
