*Stretch out your vision....*

"We believe development is more than creating beautiful residential or commercial spaces. It is creating living environments with character which are well planned, cohesive, connected and allow people to live, work and enjoy themselves at close quarters. We move an extra mile or make an extra effort towards that end. Fortune Clouds@k reflects that commitment quite eloquently. It exceeds the expectations of our customers in every way."

Sri Seshagiri Rao, B  
CMD - Fortune Infra

**For A Change,  
Shift over to Clouds ...**

We believe living is more than being. It is essential in evolving towards self-actualization. And a home is more than a transient shelter. It is essence. It is its capacity for creation, its quality of representing the persona of the people who live in it.

Fortune Clouds@k draws its inspiration from the infinite, shape-shifting dances of clouds. Puffy one time, piled up at another time, flat sometimes and layered at another moment they demonstrate remarkable malleability & transformation. Fortune Clouds@k incorporates several features that lend space for innovation and accretion. It has replaced all the essential elements that combine to make a vibrant, socially and economically sustainable living community.

**Unique In Every Sense...**

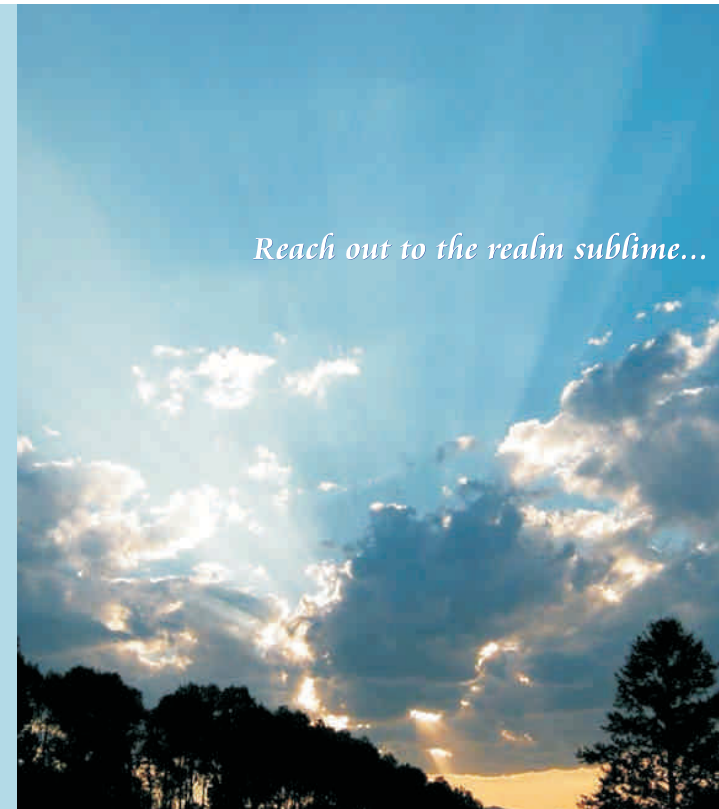

Fortune CloudsBrk is unique in more ways than one. Right from layout to features and facilities, everything about it is exquisite. It marks a truly trail-blazing initiative in development. The living spaces are arrayed into clusters of aesthetically pleasing asymmetrical shapes. From afar view, the clusters appear though a reflection of the sky on earth with its beautiful cloud formations. The landscaping, thoroughfares and all the commonly shared facilities are imaginatively placed that's sure to evoke a sense of déjàvu.

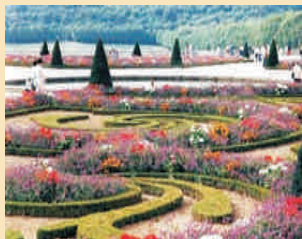

**A Twist In The Plot ...**

Fortune CloudsBrk consists of 27 acres adjoining Fortune Weekend Times, Fortune Butterfly City and Fortune Times within the 1000-acre integrated township. They stand on three glittering stellar islands on an expansive canvas, sited by plots measuring 267,500 & 1000 Sq.Yds.
