When design transcends space

Finite space is infinitely enhanced when inspired design takes the stage. The architecture envisions a vibrant development with a lush ambience, cohesive planning and community-sensitive lifestyle features.

The built-up area occupies only 28% of the total area of 3 acres affording abundant lung spaces. Vehicular access is restricted to the project periphery allowing residents to safely traverse the community areas. Ample basement and stilt level parking decongest the surface of the site, enhancing the availability of breathing spaces.

The ND Passion Elite universe comprises of 5 blocks with Basement and Stilt car parking +8 floors featuring 2 and 3BHK apartments, duplexes and penthouses. The apartments elevated by the stilt make space for a podium below which plays host a plush clubhouse and an expansive commercial wing.

- 5 residential blocks with 70% lung space .
- The residential blocks are supported with a modern club house and a commercial complex making it self contained.
