LIVING

LUXURY THAT BRINGS YOU CLOSER

We've changed how luxury apartments are constructed, identifying innovative techniques that allow us to build high-end apartments for affordable prices. Skilled architects have crafted light, airy living spaces that bring families together, and used the finest materials and finishes throughout. With Italian marble and wood flooring, ceramic bathroom tiling, and fitted kitchens with high quality fittings and safety features, you'll quickly feel right at home.

A HOME DESIGNED BY A RENOWNED, AWARD-WINNING ARCHITECT

Mumbai-based Architect Hafeez Contractor are India's preeminent architects. They take pride themselves on unique design concept and bold execution, and have shaped many of India's most famous skylines. They have undertaken projects ranging from real estate developments, public sector undertakings and large corporations to hotels, resorts and health care institutions.

85%

OF LAND AREA LEFT
AS OPEN SPACE

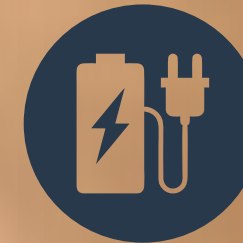

OPENNESS AND SPACE DEFINE THE DESIGN
OF THE RESIDENT TOWER

A woman with long dark hair, wearing a vibrant, multi-colored patterned dress and a matching necklace, is sitting on the edge of a swimming pool. She is holding an open book in her left hand and a glass of yellow drink with a kiwi slice and a straw in her right hand. The pool's surface reflects her and the surrounding greenery. The background is filled with lush tropical plants and a palm tree trunk, creating a serene and relaxing atmosphere.

SPACE TO BREATHE AND RELAX

In a busy world, we all need a little space to slow down. The Resident Tower is set in 4 acres of green fields, 85% of which has been left as open space for residents to enjoy, whether relaxing in Central Park or playing a round of golf. The overriding sense of openness and space has been incorporated into the design of the apartments and into the low density nature of the tower itself.

SPACE & QUALITY

A young boy with dark hair, wearing a white t-shirt and light-colored pants, is sitting on a highly reflective, polished marble floor. He is leaning against a white marble pillar and is intently reading a book. The scene is set in a well-lit, elegant interior space, likely a hallway or a room with classical architectural elements. The lighting is soft, creating a warm and serene atmosphere. The reflection of the boy and the pillar is clearly visible on the glossy floor.

OUR ITALIAN MARBLE

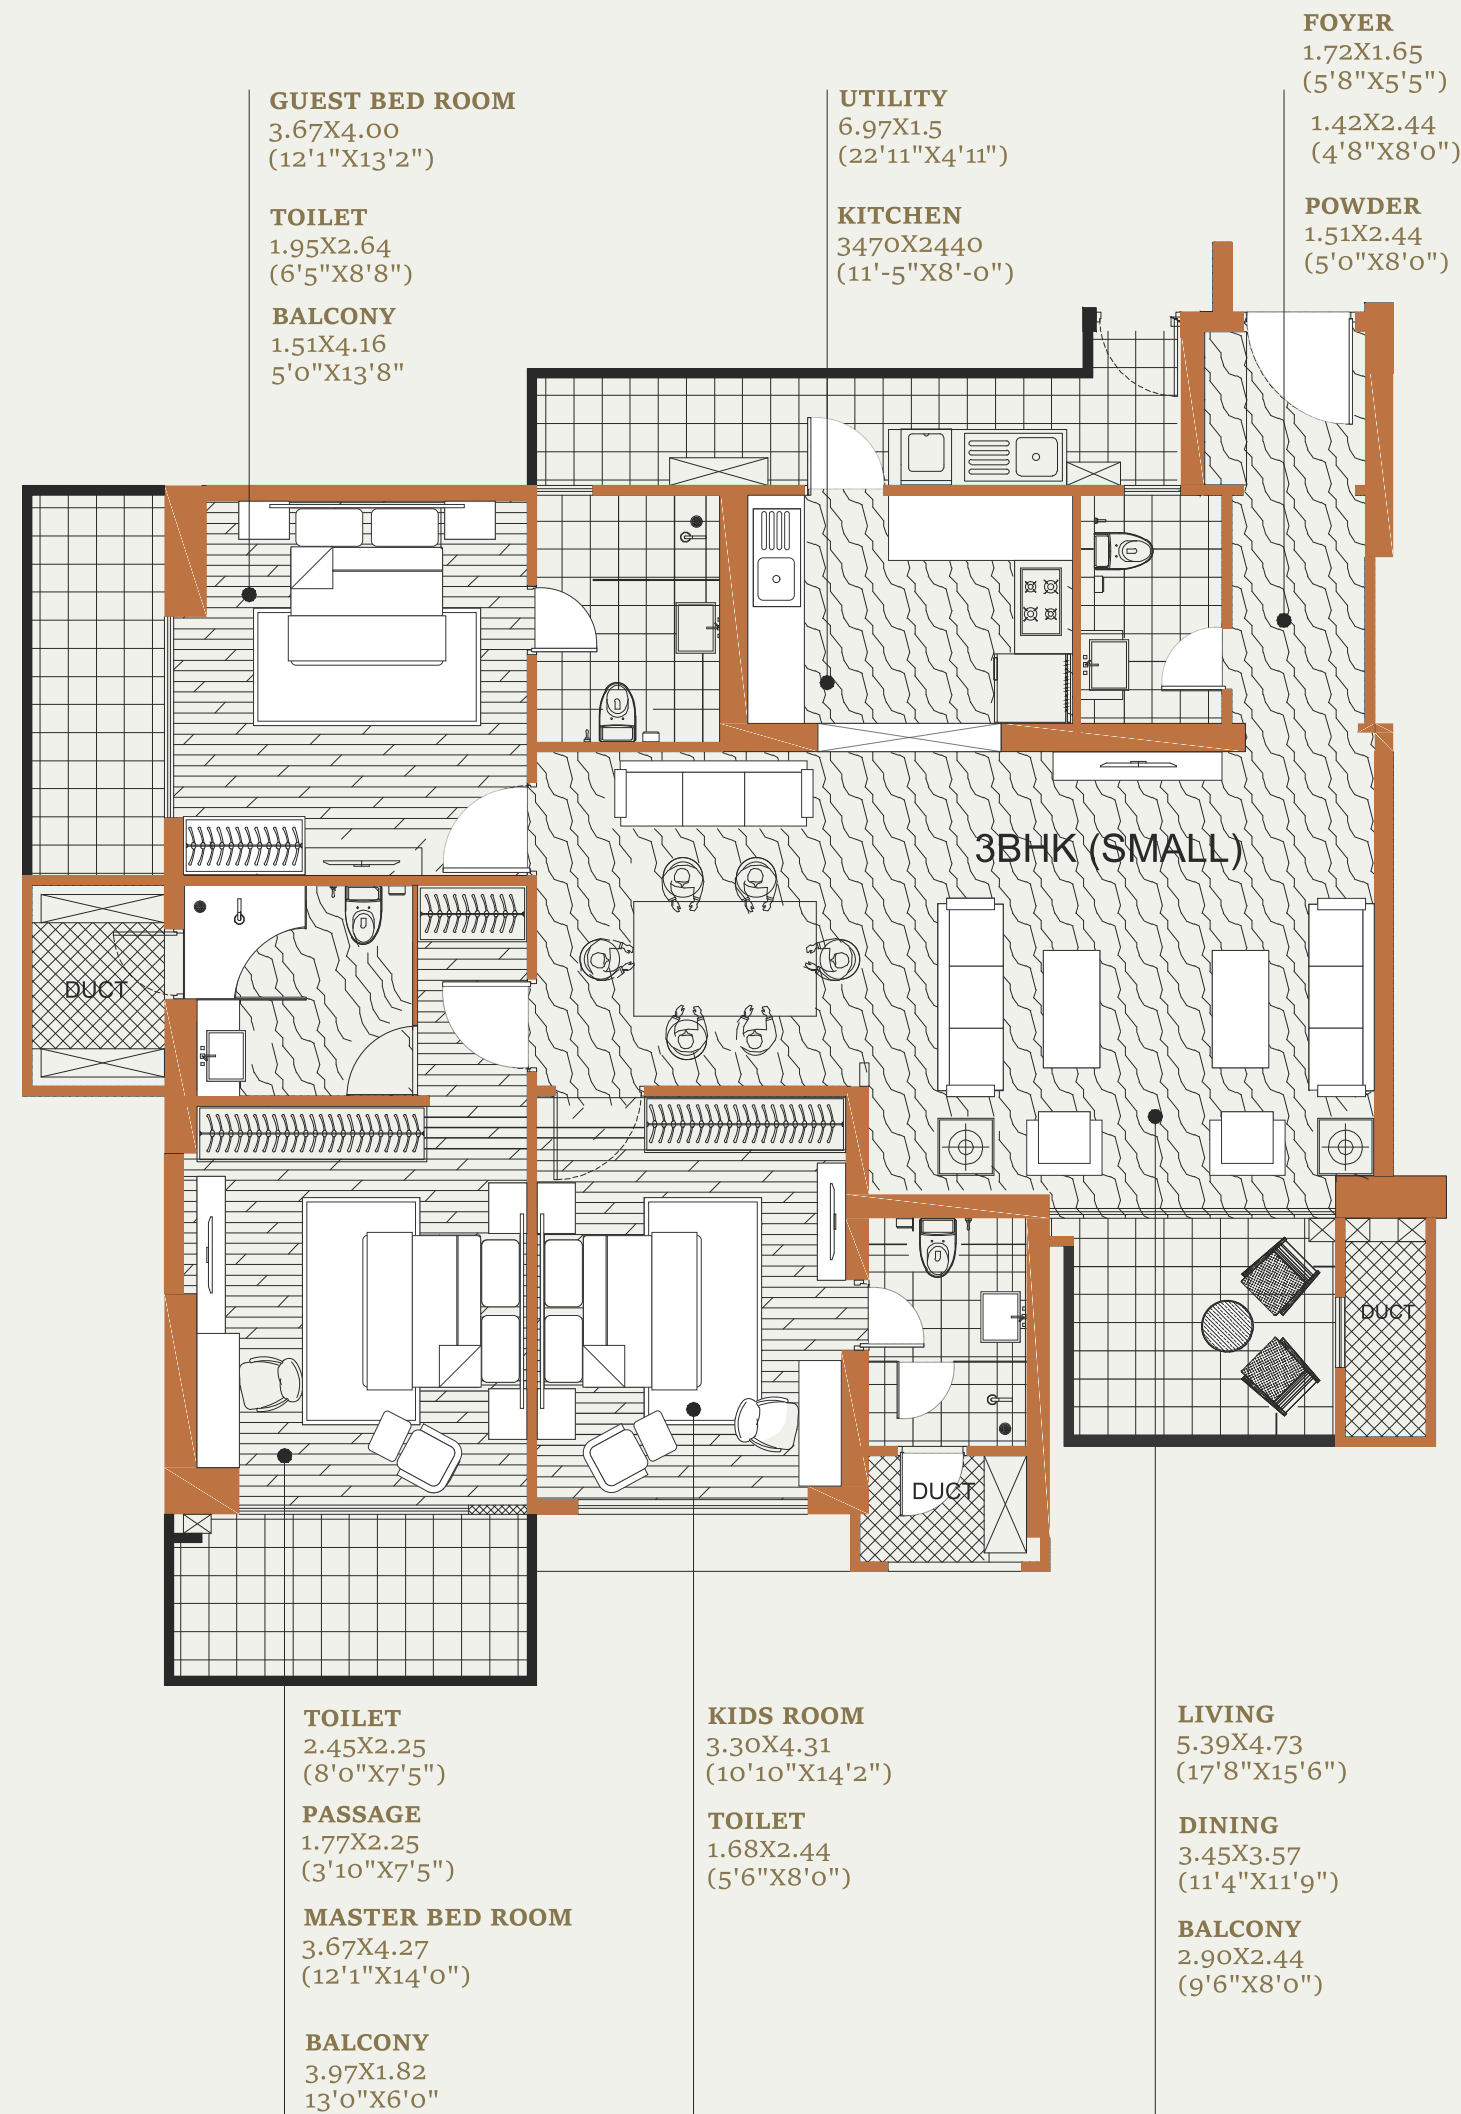

The story of Carrara Marble goes hand in hand with the Bufalini name. The Bufalini family has been producing the highest quality stone and marble for over 300 years, honing their expertise and competence. Examples of their knowledge and beautiful craftsmanship can be seen in some of the world's most important buildings, and now in the living rooms, dining rooms and kitchens of The Resident Tower apartments.
